

Satellite Radio is very beneficial to me. Satellite Radio offers a high quality product that cannot be found anywhere. The ability to listen to commercial free radio, along with the ability to get traffic and weather updates real time for any city I may be traveling to is very beneficial to me. I respectfully urge you to reject NAB petition 04-160, and allow satellite radio to provide the kind of programming that I prefer. After all, the consumer is ultimately the one effected and hurt by this petition.

Sincerley,
